DIGICARE

DIGITAL HEALTHCARE PLATFORM

A Modern And Connected Health Platform For Hospitals And Care Providers

Remote Patient Engagement

- ✔ Collects health data from smart medical devices and shares with health professionals.
- ✔ Improves transparency, builds stronger relationship and empowers patients.
- ✔ Timely intervention yields improved outcomes and better health management. Use patients' clinical data, habits and other factors to create effective treatment plans.
- ✔ Measure the degree of treatment adherence.
- ✔ Enables effective post-acute care, which drives patient satisfaction and improves outcomes.

CLINICAL DATA INTEGRATION

- ✔ Cloud data storage helps maintaining compliance and allows data sharing with other parties in the eco-system.
- ✔ Doctors can view up-to-date patients' history and analyze to take necessary actions.
- ✔ Clinical data is merged with real-time vitals collected via M2M capable medical devices.
- ✔ Seamless integration enables effective care management and improves clinical outcomes.

CONNECTED CARE SYSTEM

- ✔ Advance analytics, secure messaging and integrated PHR/EHR deliver efficient chronic care management and decreases readmissions
- ✔ Effective post-acute care drives patient satisfaction and improves outcomes.
- ✔ Treatment plans, health discussions and health tips with professionals via MMS and telemedicine.
- ✔ Connected healthcare via gadgets, and M2M capable medical sensors improves adherence and satisfaction
